OUR SCHOOL

The French International School of Podgorica, established in 2018, welcomes children of all nationalities from kindergarten to 12th grade.

The children receive a solid multilingual education. Secondary school students prepare for the National Certificate of Education and the Baccalaureate.

At all levels, the methods used make the student the actor of his learning by developing responsibility, autonomy, cooperation and perseverance. The small number of students allows for personalized support aimed at personal development and excellence.

The school puts at the center of its practices the questions which touch the environment: to know its environment, to respect it, the stakes, the practices to implement to form the future citizens of tomorrow
